

# Mathematical Challenges in Quantum Mechanics Seminar

**We present a series of seminars on current topics of mathematical physics held by renowned researchers with special attention to the mathematical methods of quantum mechanics. The seminars are aimed at a wide audience and particularly at doctoral students and young researchers.**

**The seminar is organized by the mathematics departments of three different universities: the Politecnico di Milano, the University of Insubria in Como and the Federico II University of Naples.**

**The seminars will be held online typically on Monday afternoon at 15 pm (CET). Please register using [this web page](#) and you will be automatically included in the list of seminar participants.**

**Claudio Cacciapuoti  
Raffaele Carlone  
Michele Correggi**
